

# Fractions

# WHAT IS A FRACTION?

- When an object is divided into a number of parts then each part is called a *fraction*.

# Parts of a Fraction

$$\frac{1}{2}$$

1 = the number of parts

2 = the total number of parts that equal a whole

# Parts of a Fraction

$$\frac{1}{2}$$

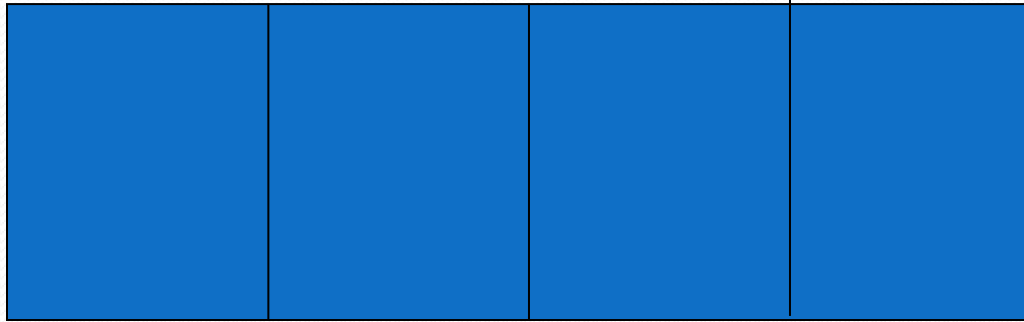

1 = numerator

2 = denominator

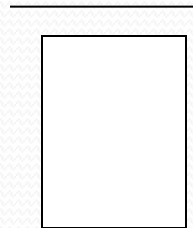

How many equal parts are there in this shape?

OR

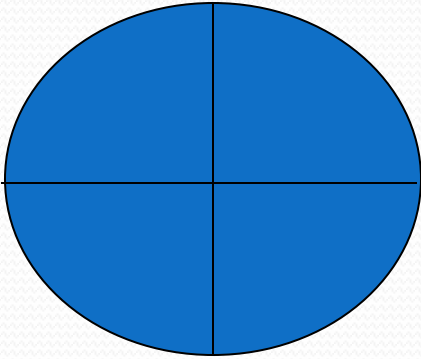

What is the denominator of this fraction?

**1**
