

Name: \_\_\_\_\_

GRADE: \_\_\_\_\_

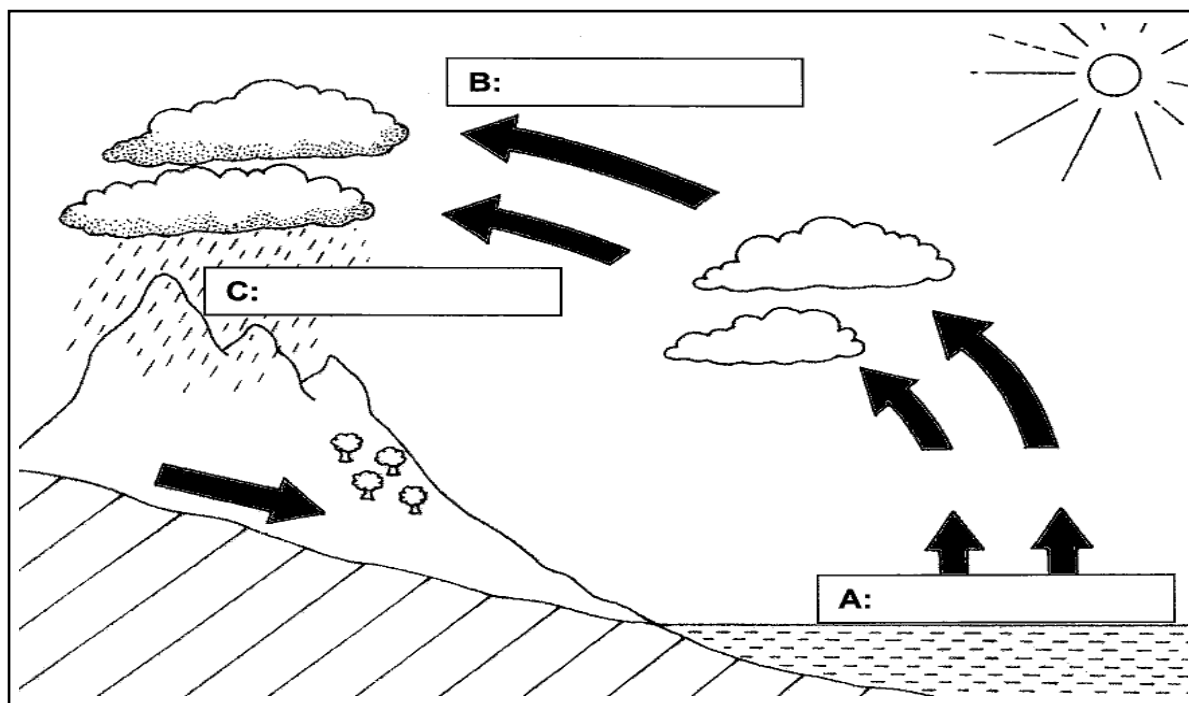

Revision exercises: The Water Cycle

SCIENCE

The diagram below shows the water cycle.

1. Label parts **A**, **B** and **C** on the diagram using the correct word from the list below:

**Melting - Condensation - Evaporation - Erosion - Precipitation**

2. Now, choose the suitable word between brackets to fill in each blank.

- (a) Water can exist in \_\_\_\_\_ states or forms. (**two - three - four**)
- (b) The process during which liquid water changes into a gas known as water vapour, is called \_\_\_\_\_ .  
(**evaporation - precipitation - condensation**)
- (c) High in the sky, when water vapour condenses, it forms tiny \_\_\_\_\_ of liquid water. (**solid - gas - droplets**)
- (d) \_\_\_\_\_ is an example of water in the solid state.  
(**Snow - Steam - Rain**)
