LENGTH AND PERIMETER

Remember
Perimeter of rectangle = (length + width) x 2

1. A rectangular field is 60 m wide. Its length is 30 m. Ali runs round the field.
what distance does he run?

2. A rectangular field is 40 m wide. Its length is **3 times** its width. Sam runs round the field. What distance does he run?

3. A rectangular field is 20m wide. Its length is **3 times** its width. If Tom runs **twice** round the field, what is the distance he runs?
